TRUE CINNAMON BY LALAN

Ceylon cinnamon
Buyer specification guide

Product selection and the details to agree before requesting samples or a quotation.

1. Select the product and packing format

Format	Catalogue / profile information	Confirm in your enquiry
Bulk quills	The catalogue describes selected Alba, C5 Special, C5 and C4 grades, cut to custom lengths and packed in 1 kg blocks.	Grade, cut length, appearance, pack arrangement and order quantity.
Retail quills	The catalogue lists C4 quills in 50 g packs with 4-inch sticks. Product photographs also show a 100 g quill pouch.	Current pack availability, label and carton requirements.
Premium quills	The catalogue describes C5 and C5 Special quills in glass spice bottles.	Bottle size, grade, cut length, quantity and packaging.
Cinnamon powder	The catalogue lists 35 g, 50 g and 1 kg packs.	Particle-size requirement, intended use, pack weight and quantity.
Other grades / formats	The company profile also describes M5, H grades, cut quills and cinnamon oil.	Availability, exact grade or oil type, product specification and packing.

2. Define the approval specification

Record Cinnamomum verum, Sri Lankan origin, grade, intended use and the approved sample. Agree diameter, moisture and particle-size criteria in writing. Packaged products have a stated shelf life of 18 months; check the pack date instructions and confirm bulk shelf life separately.

3. Plan the commercial order

Bulk orders generally start at around 100 kg, subject to product and packaging confirmation. Retail options include 50 g packs and the other catalogue sizes above. White/private label and OEM options are available. Payment terms are agreed according to quantity and destination. Confirm sample costs, lead times and delivery terms in your quotation.

TRUE CINNAMON BY LALAN

Quality & traceability Approval checklist

Keep the specification and supporting evidence together in your supplier approval file.

Verified FSC record: Lalan Rubbers (Pvt) Ltd.; FSC-C101709; CU-FM/COC-828688. Official register checked 12 November 2026: valid until 4 November 2031, with Cinnamon (Cinnamomum verum) in the product scope. Verify current status and scope online. Confirm the FSC claim applicable to your order; this is separate from food-safety certification.

Document / record	What to ask for
Current certificates	The company profile identifies FSSC 22000, GMP, FSC, SL-GAP and Ceylon Cinnamon GI credentials. Request current holder, facility, scope, validity and verification details. Confirm the product claims applicable to your order.
Origin and batch records	Ask how the sample and finished pack or carton lot link to production and packing records and to the Sri Lankan origin. Confirm which records can be shared.
COA / laboratory reports	Agree which tests your application requires and whether reports are available for the proposed lot. Confirm methods, units, laboratory, sample or test date and batch identity.
Specific testing needs	Where required, discuss coumarin, moisture, heavy metals, residues and microbiological panels. Confirm limits, availability, additional testing costs and timing before ordering.
GI / PGI labelling	Confirm current authorisation, applicable product specification and traceability before using a GI or PGI claim. EU registration of the name alone does not establish an individual supplier's authorisation.

What this guide confirms

Based on Lalan's 2026 profile, catalogue, supplied photographs, confirmed commercial details and the official FSC register. This is an enquiry guide, not a certificate, lab report or binding offer. It does not assert that every lot has been tested for every parameter.
